

Mapping your **SUCCESS SEQUENCE**

What you do today can determine your tomorrow.

Achieving your life goals in a healthy order can help set you up for long-term happiness. Youth who follow the Success Sequence in order have a 97% chance of avoiding living their life in poverty - follow this roadmap to make sure you live your happiest, healthiest life.

1. Get a high school diploma

Your biggest goal right now should be to complete high school. Consider if college is the right path for you – if it isn't right now, it might be in the future. There are a lot of scholarship opportunities and other career options such as trade school and apprenticeship programs available – work with a school counselor or a trusted adult to find them.

2. Get a full-time job

After your school is complete, find a full-time job and start saving for your future as much as you are able to.

3. Get married before having children

Wait until you are married before having children. Being financially stable and in a stable relationship will give your child the best start to their life. Taking care of a baby is difficult, and it is much easier with both parents.
